

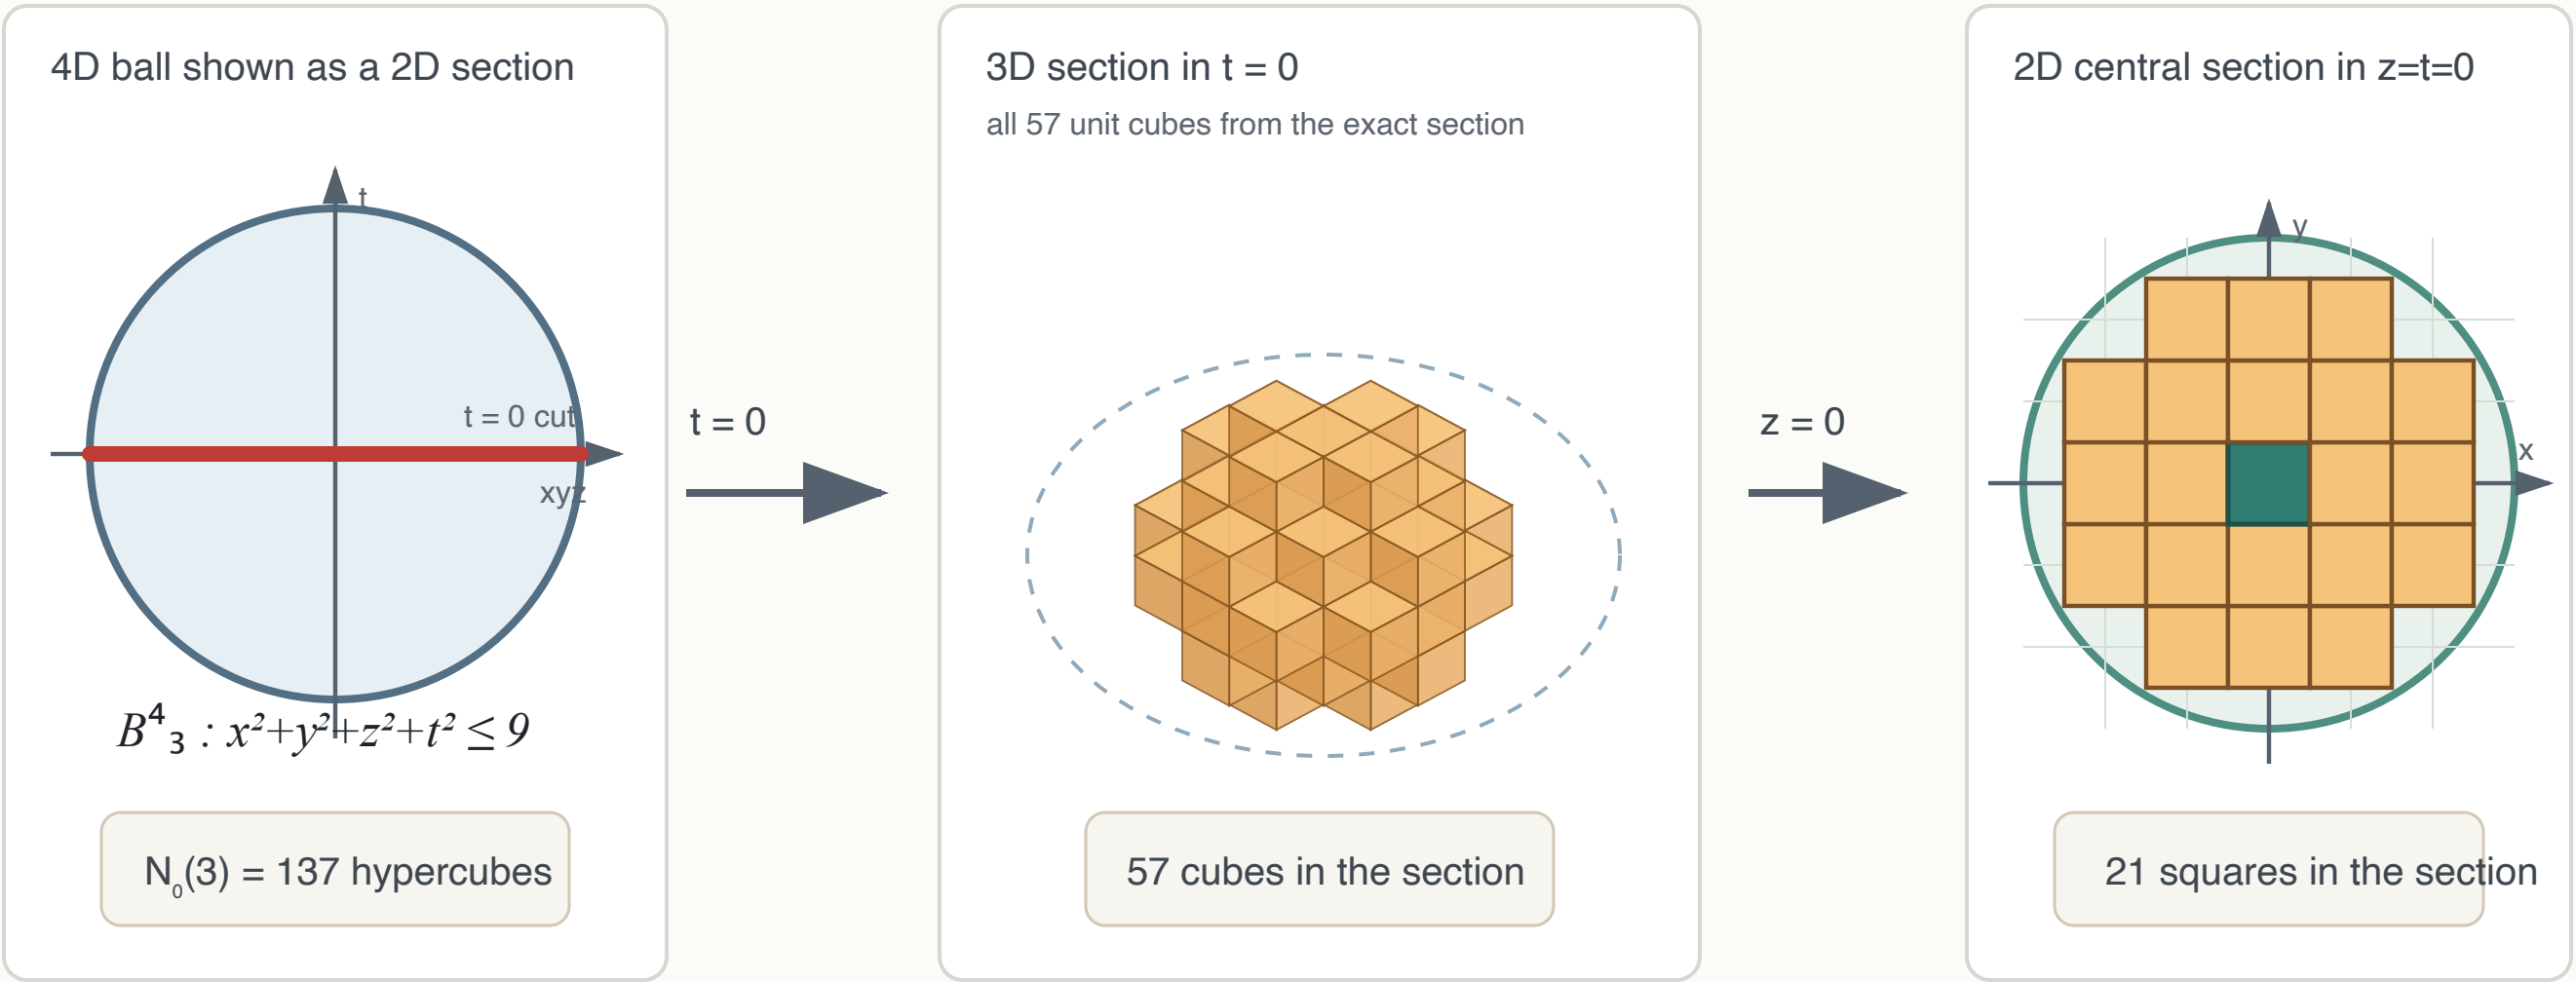

Figure 1. Exact Sections of the R=3 Four-Dimensional Cell Model

Data: 137 fully-inscribed unit hypercubes in B^4_3 . Sections are computed from the actual cell set.

Exact section map: 4D cells in $B^4_3 \rightarrow t=0$ 3D cube section $\rightarrow z=t=0$ 2D square section

The left panel is only a 2D representation of the 4D ball; the 3D and 2D cell sections are computed from the actual 137-cell model.
