

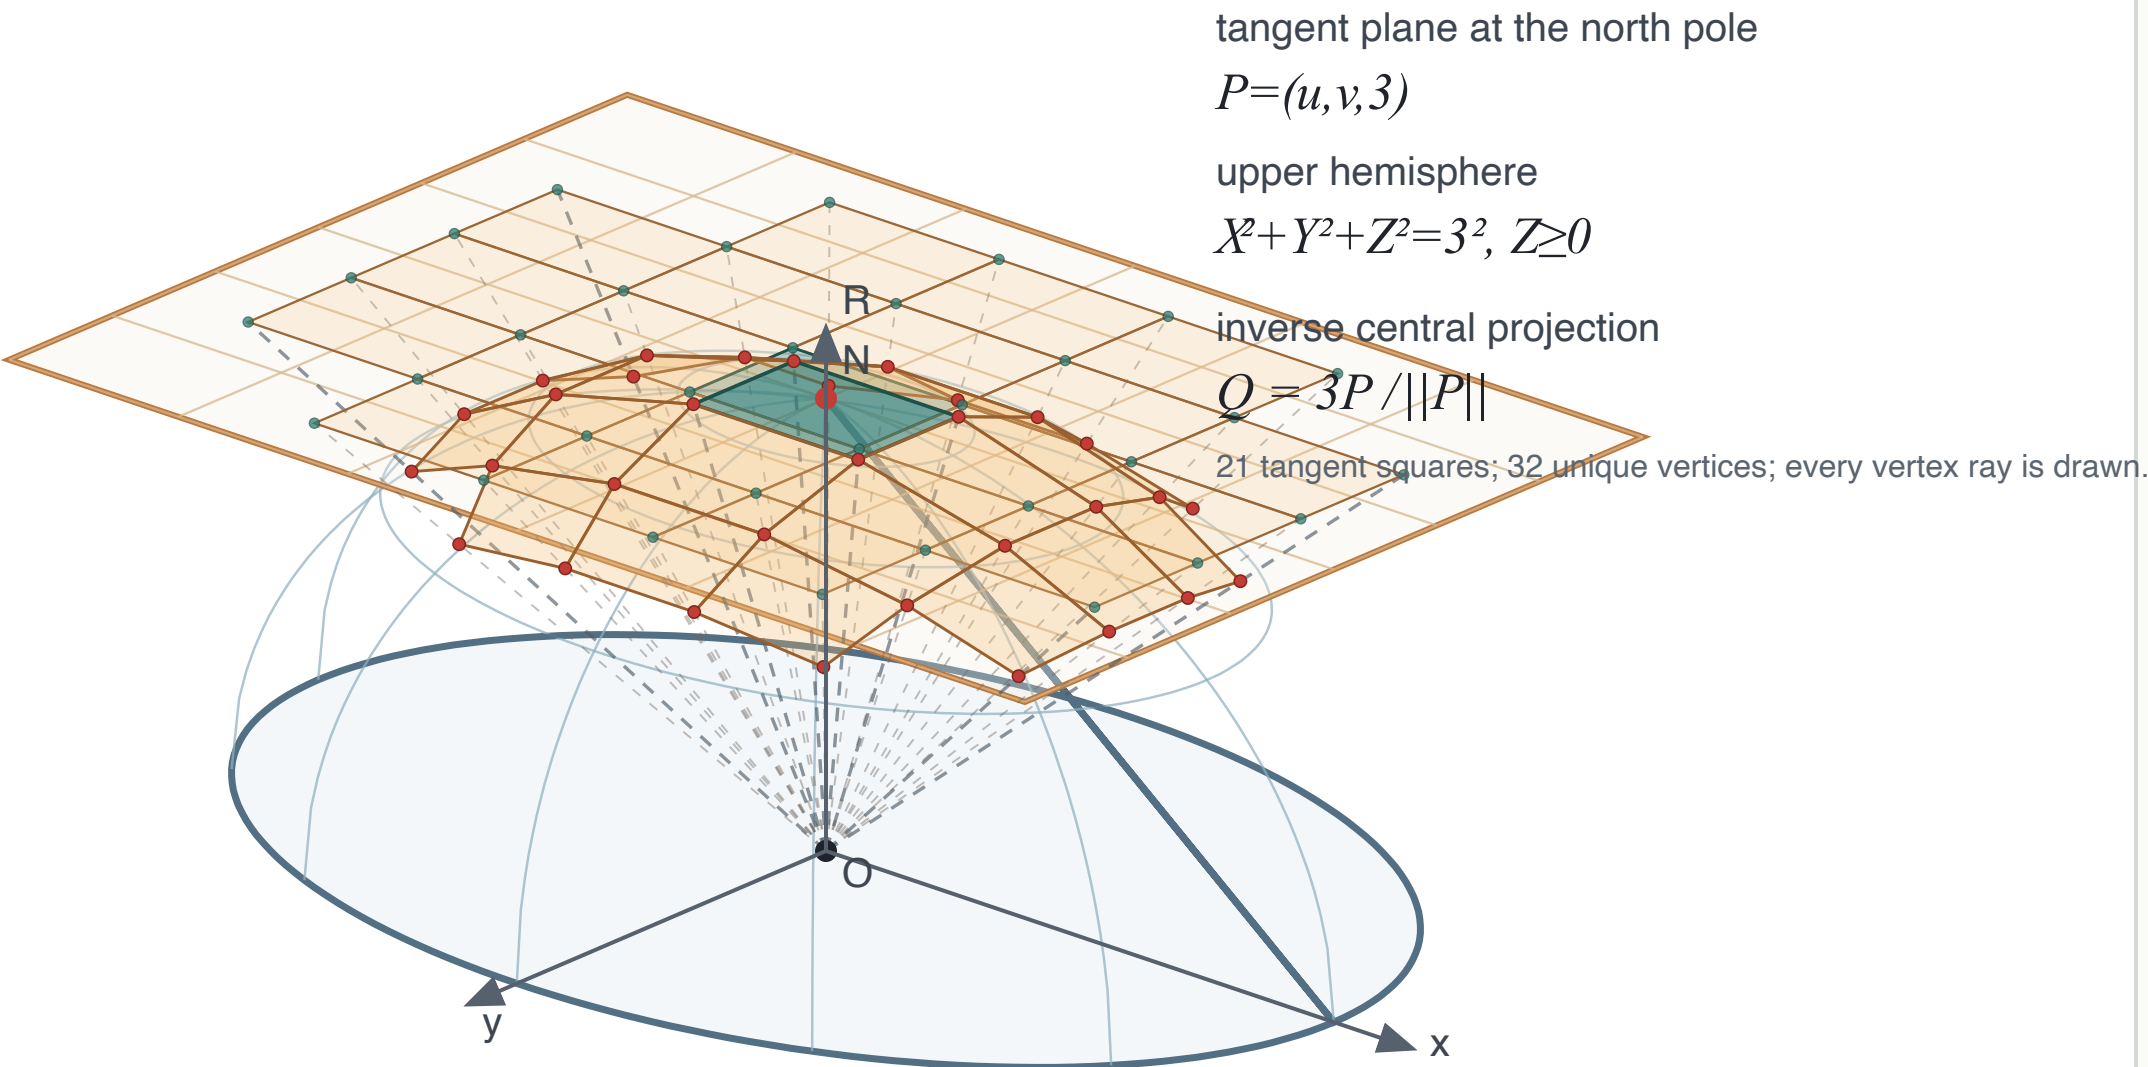

# Figure 2. Exact 3D Inverse Central Projection to the R=3 Hemisphere

All vertices of the 21-square central section are projected from the tangent plane Z=3 onto the upper hemisphere.

Exact data map: the 21-square section from Figure 1 is placed on Z=3; every tangent-plane vertex P is joined to O. Each line meets the R=3 hemisphere at Q. This is a state-space reading, not a physical spacetime curvature claim.
