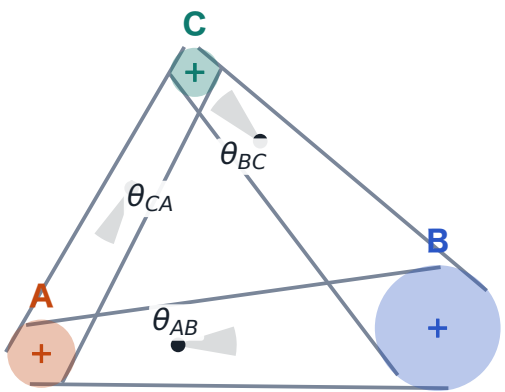
Fig. 2 Three bodies: the three viewing angles and the size ratios are readable; the overall scale λ is not (angles coincide)

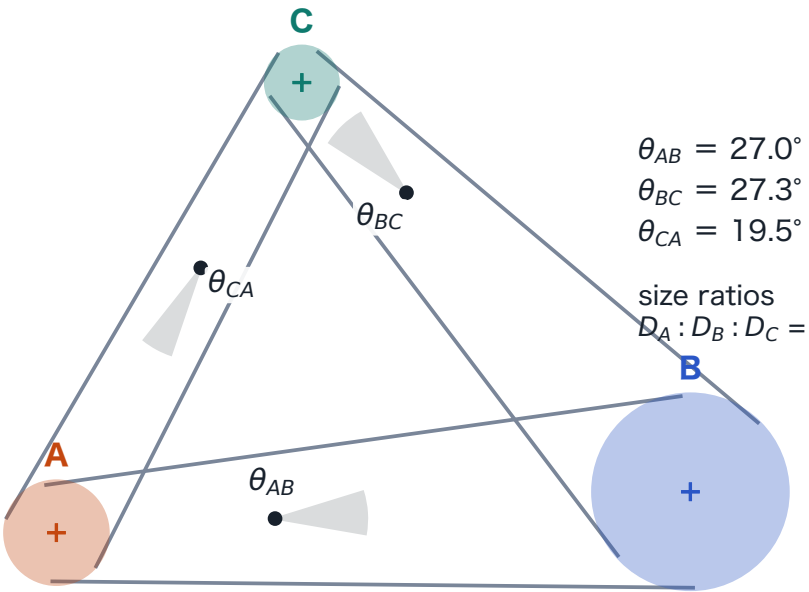
(a) three bodies A, B, C



$\theta_{AB} = 27.0°$
$\theta_{BC} = 27.3°$
$\theta_{CA} = 19.5°$

size ratios
$D_A : D_B : D_C = 1 : 1.9 : 0.7$

(b) the same scaled by $\lambda = 1.6$



$\theta_{AB} = 27.0°$
$\theta_{BC} = 27.3°$
$\theta_{CA} = 19.5°$

size ratios
$D_A : D_B : D_C = 1 : 1.9 : 0.7$
